

Todo List System

- Project Documentation
- Admin & User System

Overview

- Web-based Todo List System
- Frontend: React
- Backend: FastAPI
- Database: SQLite

User Types

- User:
 - - Manage personal tasks
 - - Mark tasks as completed
- Admin:
 - - Manage all users tasks
 - - View task completion

System Architecture

- Frontend (React)
- API Layer
- Backend (FastAPI)
- Database (SQLite)

Backend Structure

- `main.py` – routes
- `models.py` – DB models
- `schemas.py` – validation
- `database.py` – DB connection

Security

- Password hashing (bcrypt)
- JWT
- Role-based authorization
- Admin-only routes

Frontend Structure

- App.js – routing
- TodoPage.js – user tasks
- AdminPage.js – admin panel
- CalendarPage.js – calendar view

Admin Panel Features

- View users
- Create/Edit/Delete tasks
- Sort by due date
- Completed tasks shown last

Task Sorting Logic

- Open tasks first
- Sorted by closest due date
- Completed tasks moved to bottom

Calendar

- Monthly calendar view
- Highlight days with tasks
- Filter by due date

Validation

- Frontend & Backend validation
- Prevent past dates
- Required fields

Future Improvements

- Deployment
- Docker support
